

RANDOM SAMPLING WORKSHEET

REQUIRED SAMPLE SIZE

Number of approved applications on file on 10/31:

X .03

= _____ or 3,000 applications, whichever is less.
(round all decimals up)

Randomly select the required number of applications. In a random selection, all applications both categorical (FDPIR) and income must have an equal chance of selection.

FOCUSED SAMPLING WORKSHEET

Required Number of Applications with Income Information to Verify

Total number of approved applications on file on 10/31:

$$\underline{\hspace{2cm}} \times .01$$

= or 1,000 applications, whichever is less.
(round all decimals upward)

From the applications with income information, select applications with reported income within \$100 a month (\$1200 a year) of the free and reduced-price eligibility levels. Continue selecting applications until the required number of applications are chosen.

REQUIRED CATEGORICALLY ELIGIBLE SAMPLE

Total number of categorically eligible applications (those with FDPIR case numbers):

$$\underline{\hspace{2cm}} \times .005$$

= or 500 applications, whichever is less.
(round all decimals upward)

From the applications with a FDPIR case numbers, select applications using any method that is equitable and ensures that the same household is not selected each year.
